Education

- 2021 – 2023 **Graduate Research in Systems Biology (Doctoral-level coursework, non-degree)**, *University of Montreal*, Montreal, Canada
- 2019 **Post-Graduate Specialization in NLP & Data Science (Non-degree coursework)**, *University of Lorraine / Institute of Digital Sciences*, France
- 2017 – 2018 **M.Sc. Year 2 Interdisciplinary Approaches to Life Sciences**, *Learning Planet Institute (University of Paris)*, Paris, France
- 2016 – 2017 **M.Sc. Year 1 Interdisciplinary Approaches**, *Learning Planet Institute (University of Paris)*, Paris, France
- 2010 – 2014 **B.Tech. in Biotechnology Engineering**, *NIT Jalandhar*, Jalandhar, India

Professional Experience

- Oct 2025–Dec 2025 **Operations Supervisor (Contract)**, *Gate Gourmet Canada Inc.*, Montreal, QC
- Oversaw end-to-end production and dispatch workflows for international flight catering in a secure, time-critical setting.
 - Enforced HACCP and security protocols while ensuring SOP consistency across a diverse frontline workforce.
 - Served as primary escalation contact for live logistics disruptions, resolving kitchen-to-aircraft discrepancies.
- May 2025–Jun 2025 **Production Supervisor (Contract)**, *Newrest Travel Retail*, Montreal, QC
- Conducted daily specification checks for technical sheets, product weights, and cold-chain temperatures.
 - Managed traceability records and expiration-date controls to support audit readiness and inventory integrity.
 - Built weekly production plans to improve timing visibility and workflow execution.
- Feb 2024–Jan 2025 **Kitchen Manager**, *WeCook*, Montreal, QC
- Coordinated cross-department preparation workflows to improve throughput and maintain quality standards.
 - Supervised and coached kitchen team members while reinforcing safety practices and process discipline.
 - Contributed to efficiency initiatives by designing and implementing workflow optimization protocols.
- Mar 2023–Feb 2024 **Quality Control Technician**, *WeCook*, Montreal, QC
- Executed twice-daily inspections, verified production records, and monitored critical control points (CCPs).
 - Verified calibration and functionality of thermometers, probes, and scales to maintain measurement reliability.
 - Identified non-conformities and implemented corrective actions aligned with GMP and GHP requirements.

Research Experience

- May 2021–Apr 2023 **Graduate Research in Systems Biology**, *IRIC – Institute for Research in Immunology and Cancer*, Montreal, QC
- Developed mechanobiology tools and image-analysis workflows to study cancer cell behavior in controlled environments.
 - Applied quantitative methods to improve experimental consistency and interpretability.

- May 2018–Sep 2018 **Research Intern (Quantitative Analysis)**, *Institut Pasteur*, Paris, France
- Built a data-analysis pipeline using LORY, MorphoJ, and PCA for morphometric study of *Drosophila* wings.
 - Presented results to interdisciplinary research audiences.
- Feb 2018–May 2018 **Research Intern (Microbiology)**, *CNRS – Délégation d'Ile de France Sud*, Paris, France
- Engineered fluorescent fusion proteins to investigate cellulose secretion mechanisms in bacteria.
 - Performed microbiology assays, fluorescence microscopy, and protein purification workflows.
- Feb 2017–Jul 2017 **Research Intern (Systems Biology)**, *Institut Curie*, Paris, France
- Developed and optimized cell enucleation protocols for mechanosensing studies.
 - Improved image-analysis methods for membrane blebbing characterization.

Highlights

- Led production, dispatch, and quality workflows in time-sensitive food operations environments.
- Supported audit readiness through HACCP, GMP/GHP, traceability, and documentation controls.
- Coordinated cross-functional teams, coached frontline staff, and handled live operational escalations.
- Applied quantitative analysis, image analysis, and reporting discipline in research settings.

Core Competencies

Operations: Supervision, workflow optimization, production planning, SOP compliance

Quality: HACCP, GMP/GHP, traceability, documentation, corrective actions

Leadership: Team coaching, cross-functional coordination, escalation management

Technical: Python, image analysis, quantitative analysis, process reporting

Certifications & Languages

Certifications: Lean Six Sigma White Belt (CSSC, Jan 2026); Fundamentals of Equities (Interactive Brokers, Feb 2025)

Languages: English (Fluent), French (Beginner), Hindi (Native), Punjabi (Native), Urdu (Fluent)

Publications

White Paper: Operational Viability of an Integrated Hot Kitchen at Lufa Farms. Independent study. Zenodo record

Article: *Developmental Cell* (2024). *Rigidity percolation and active advection synergize in the actomyosin cortex to drive amoeboid cell motility*. Co-author. doi.org/10.1016/j.devcel.2024.06.023
